SKILLS

- C#, C++, Java, Python
- Clean Code
- Design Patterns
- SQL & NoSQL
- Unity/Unreal Engine
- Blender/Shaders
- Linux & Networking

EDUCATION

BACHELOR OF SCIENCE IN ENGINEERING

UAS St. Pölten 2022 - 2025

- *Studying Creative Computing program*
 - Focus on game development
- Browser Game Coding
 - Javascript, NodeJS, Databases
- Responsive UI/UX design
 - Prototyping & Testing
- Game Development
 - Game Design & Story Telling
 - Android Studio, Unity & C#
 - 3D Modelling, Game Audio

ACADEMIC SECONDARY SCHOOL

HTL St. Pölten 2015 - 2020

- Java
 - More into detail
 - Design Patterns
 - Spring Boot Web Services
- Python
 - Machine Learning
- Network technologies
- Databases

ABOUT ME

I'm a passionate software developer, who occasionally enjoys gaming with friends. My true passion for game development originated when I was 10 years old. Ever since I started playing my very first online game, I have always been looking up to the real creators behind the scenes, who put countless hours into creating their own game experience for others. That is why I am dedicating my life to create my very own game experience for others.

WORK EXPERIENCE

JAVA/C# SOFTWARE DEVELOPER

PERI October 2019 - Today

- Spring Boot Rest APIs
- CI/CD pipeline, Azure DevOps
- Bash/Python scripting
- Azure Function Apps, C#
- Recruitment and onboarding
- Postgres Database maintenance
- Ranorex: Test automation
- JUnit Test writer

PERSONAL EXPERIENCE

- In my spare time I often dedicate time to gain knowledge in different fields of game development: C++, design patterns, client - server communication, programming, clean code, password security, databases, 3D modelling and animating
- Projects: a single player RPG, a 2D MMO RPG, an RPG browser game, a chess website with user and password handling, a pure JavaScript & HTML Tetris, NodeJS backend services for twitch streamers and a 3D christmas themed tower defense game

CERTIFICATIONS

- C++ Institute: C++ Associate Programmer Certification
